CORE COMPETENCIES

Custom Industrial Crating

Engineered wooden crates and shipping containers for oversized, sensitive, and high-value equipment. Industrial machinery, electronics, vehicle components, and specialized cargo for domestic and international transit.

Heavy-Duty Nailed Wood Crates

Engineered for industrial and vehicle components, sized and reinforced to the load.

Pallets & Skids

New hardwood and softwood pallets to any specification, including heavy-duty and non-standard dimensions. Grade A and Grade B remanufactured pallets for general cargo.

Cleated Plywood Boxes

Fabricated to customer drawing or specification for equipment repacking and protected transit.

Skidded Crates & Bases

Skid-mounted platforms for shelters, tentage, and large-scale equipment requiring forklift or crane handling.

Dunnage, Blocking & Bracing

Cut-to-size and treated lumber for load securement and shoring.

DEFENSE PACKAGING READINESS

Victor Wood Products is entering the federal market from an established commercial manufacturing base of over twenty years.

We build to customer drawings and written specifications as a matter of routine, and we are prepared to fabricate, mark, and document to **MIL-STD-2073-1** (military packaging) and **MIL-STD-129** (military marking and labeling) requirements, including Levels A, B, and C protection, and to Special Packaging Instructions where cited.

We source ISPM-15 heat-treated lumber under certification and welcome the opportunity to demonstrate compliance through a first article or initial order.

DIFFERENTIATORS

Mid-Atlantic Proximity

Baltimore facility within 90 minutes of Aberdeen Proving Ground, Coast Guard Yard Curtis Bay, Fort Meade, and DLA Distribution Susquehanna. Short lead times, direct delivery, no long-haul freight cost.

Engineered to Spec

Every crate designed to the load. Two decades of custom fabrication for irregular, oversized, and high-value cargo — not catalog sizes.

Twenty Years Operating

Established supplier base, stable workforce, and a documented commercial track record.

Direct Principal Access

Family-owned operation. The people who quote the job run the floor.

Facility Visits Welcome

Operational manufacturing site in Baltimore, open for inspection or pre-award survey at any time.
